

## ISA Brown

The ISA Brown is recognised globally for its exceptional feed conversion, which makes it one of the most efficient and profitable brown egg layers in the world.

Producing high numbers of first quality eggs, per hen housed, the ISA Brown is a proven, reliable and versatile layer which adapts well in differing climates and housing systems. Optimal egg size, strong shells and great laying persistency also makes the ISA Brown perfectly suitable for longer laying cycles.

	Free Range	Colony
--	------------	--------

Eggs per hen housed to 72 weeks	307	322
---------------------------------	-----	-----
